

SWiCH Epidermal Repair System

A scientific breakthrough enhancing and restoring the function of the skin to its youthful appearance, SWiCH gives the professional skin specialist a treatment that performs beyond the results achievable with non-surgical peels. Laboratory tested ultrasound procedures have shown that after six treatments, skin is firmer, smoother, and embedded with new Collagen and Elastin growth. Recommended as a series of 4-6 treatments, one every 4 weeks, followed by a 3 month maintenance treatment. There is very little, if any, downtime and it is safe to be performed all year round.
